

Xm satellite radio is a very important part of the information network. While travelling from Boston to NC just in the last 10 days I used xm's weather/traffic channels to alert me to traffic tie-ups in several areas. I would not have known how to find out this information and possible alternate routes from am/fm stations in unfamiliar areas. I respectfully urge the FCC to reject the NAB's petition 04-106 and let xm continue to give their paying customers the quality of service that we deserve.

Thank you.
